Delock External Enclosure 2 x M.2 Key B > USB 3.1 Gen 2 with RAID

Description

The aluminium enclosure by Delock enables the installation of two M.2 SSD in 2280, 2260, 2242 and 2230 format, which can be connected via USB Type-C™ to the PC or laptop. When using more than one SSD, there is the possibility to use different RAID level.

Note

The package contains the cable USB-C™ male to USB Type-A male. This can also be used only in this direction. Therefore the USB-C™ male must be connected to the computer and the USB Type-A male to the enclosure.
Optionally there is a cable from Delock USB Type-A male to USB Type-A male (83981), so that this enclosure can also be connected to a computer with USB Type-A interface. In addition, there is the possibility to connect a power supply if the power from the USB port is not enough.
